Pedestrian Barrier Telescopic Gate Assembly instructions

Gate Installation:

1. Install hinge and catch post as per Pedestrian Barrier instructions.

2. Connect the gate hinge to the hinge post.

3. Fasten the gate to the post at each connecting point using the gate fixing kit.

4. Using allen keys secure each of the 3 fixing points.

5. Adjust telescopic arm to suit opening.

6. Secure telescopic arm by securing set screws on the underside of both the top and bottom tubes.

7. If desired, apply the PUSH and PULL labels as appropriate.

8. Gate installation complete.
Pedestrian Barrier Telescopic Gate Assembly instructions

RH/LH Gate swap:

1. Telescopic Gate as standard is supplied in the RH orientation (reference page 2 fo 5)

2. Using long nose pliers/circlip pliers remove pin retaining circlip.

3. Fasten the gate to the post at each connecting point using the gate fixing kit.

4. Remove the gate arm assembly from the hinge plate assembly.

5. Using a 4mm allen key remove the cam retaining cap head screws.

6. Rotate bottom cam from RH to LH orientation.

7. Using 4mm allen key secure cam into the LH orientation using the removed cap head screws.

8. Replace the gate arm assembly back on the hinge plate assembly.
Pedestrian Barrier Telescopic Gate Assembly instructions

9. Remove the hinge pin from the gate assembly.

10. Using long nose pliers/circlip pliers remove pin retaining circlip.

11. Ensure all 4 set screws in the gate arm are loosened off.

12. Remove the telescopic arm from the gate assembly.

13. Spin/flip around the remaining gate assembly to other direction.

14. Spin/flip over the telescopic arm to match the other direction.

15. Reinstall the telescopic arm into the gate assembly in the new orientation.

16. Conversion to LH orientation complete.
